## Hospital Industry

The health sector cannot be separated from the influence of advances in digital technology. The health industry needs to prepare itself for the health era 4.0. Various challenges and problems, especially in terms of big data, data security, regulation, and human resources should not be an obstacle in realizing a quality digital transformation system. In the end, all hospitals are ready to participate in providing complete health services in this era of disruption 4.0.

Here are 3 benefits that you will get from an IoT Solution

## Assets Monitoring

24/7 Real-time  
visibility

More secure with extra  
precautions

Best infrastructure with low  
investment

## Real-time visibility

This is to determine the location of supporting assets and employee mobility in the room

For indoor facilities,

Identity cards of doctors, nurses, administrative staff and patients who are treated in hospitals, supporting medical devices for the hospital will be installed using the TRAGG device. TRAGG is a device with Bluetooth low energy (BLE) technology which is equipped with a proximity sensor for easy tracking.

TRAGG will send location data information, distance and other information to TRAGG-Shelter (gateway). The collected data information will be sent to TRAGG-Post (cloud server), via an internet connection. In TRAGG-Post all data received will be processed using the system and then displayed in the App-TRAGG (web-based application) as a dashboard panel that provides real-time data and information.

# Tri Sukha Pratama

## Who we are?

An experienced communication technology company with more than 10 years of dedicating its business potential to continue to build and develop better communication technology.

## What we do?

Radio & Transmission Network Planning, Acquisition & Construction, Transmission, Network, Installation Technology & Communication, IT Solution.

## Why choose us?

Trusted to work together by many communication technology companies. Always supported by experienced and competent human resources in their fields.

TELKOMSEL smartfren.

## Specification

Features	Sensor	Accelerometer
	Dimensions	85.5x54x4.5 mm
	Weight	18.5g (LF,HF)/15.5g (UHF)
Protocol Options	iBeacon	Yes
	Eddystone	Yes
Radio	Bluetooth	Bluetooth 5 Compatible
	Antenna	PCB Antenna
	Interval	From 100ms to 500ms
	Transmit Power	-40dbm -20dbm -16dbm -12dbm -8dbm -4dbm -0dbm 4dbm
	Range	Up to 100 meters
Battery	Model	Li-Poly Batteru
	Capacity	800 mAh (LF,HF)/550 mAh (UHF)
	Replaceable	No
Service	Configuration App	BeaconSET+ iOS Android
	Warranty	1 year

## TRAGG

### Specification

Features	Sensor	Accelerometer sensor for option
	Dimensions	36.5x23.7x5.0 mm
	Weight	6.2g
Protocol Options	iBeacon	Yes
	Eddystone	Yes
	Sensor Data Advertising	Yes
Radio	Bluetooth	Bluetooth 5 Compatible
	Antenna	PCB Antenna
	Interval	From 100ms to 500ms
	Transmit Power	-40dbm -20dbm -16dbm -12dbm -8dbm -4dbm -0dbm 4dbm
	Range	Up to 50 meters
Battery	Model	CR 2032
	Capacity	225 mAh
	Replaceable	Yes
	Operating Temperature	-20°C to +60°C (Battery Limit)
	Battery Life	Up to 1 year
Product Compliance	Certification	CE FCC Bluetooth QDID/EPL
Service	Configuration App	BeaconSET+ iOS Android
	Warranty	1 year

# TRAGG Shelter

## Spesification

### General

- Connect to the cloud with 3G/4G USB dongle
- Data saved in TF data card or Udisk
- Support AWS/Azure/ARM mBed IoT Cloud
- Input with DC 5.0V, 1A, micro-USB
- Firmware upgraded by OTA
- Support HTTP(SSL/TLS)/MQTT(SSL/TLS & Proxy)/TCP
- Operating Temperature -25°C to 65°C
- Batch configuration tool available

### General Information

Size	150x150x36 mm
Net Weight	180g
Accessory	1x USB cable, metal fixing and screws
Power Supply	DC 5.0 (+/-5%) Max. 5.5 volts
Storage Temperature	-40°C to 85°C
Humidity	Max 95% Non considering relative humidity

### Bluetooth Low Energy (BLE)

- 64 MHz 32-bit processor
- Built-in amplifier chip to precisely scan BLE
- At least bluetooth 4.0 (Only for BLE)

### WiFi & Ethernet

- CPU 575 MHz 32-bit application processor
- 300 Mbps PHY data rate, 802.11b/g/n WiFi
- 2 USB 2.0 host connectors and 1 TF Card Slot
- 128 Mbyte 16-bit DDR2 RAM
- 16 Mbyte SPI NOR Flash
- RGB Led Strip as the status indicator
- OpenWrt, Linux distribution for embedded devices
- Support WiFi failover & Multi-higher level AP configuration
- 10/100 ethernet with 802.3af PoE
